Video Animator

Description

We are looking for a creative Animator to develop excellent visual frames with 2D/3D or other techniques. Your work will give life to storylines and characters in films, games or videos.

Animators possess a creative eye and artistic aptitude. They can easily turn a script or a concept into an impressive computer-generated animation. To excel in this role, you must be highly skilled in CGI software and storytelling.

Responsibilities

- Read scripts and storylines to understand animation requirements
- Prepare presentations with raw designs to customers
- Develop storyboards for the initial stages of production
- Create models, drawings, and illustrations by hand or electronically
- Join images with background graphics and special effects
- Ensure synchronization of frames and audio
- Participate in the editing process
- Direct the work of animation assistants
- Collaborate with production crew (designers, directors etc.)
