

React Native Developer / Mobile App Developers – Karachi

Description

We require multiple **React Native developers** responsible for the development and maintenance of applications aimed at a range of iOS and Android devices including mobile phones and tablets.

Who can help us to build “On Demand Job” APP. Who will build and develop the full project, from Front End to Back End, iOS, React Native and Android platforms from the client’s perspective, Employer’s perspective and the admin’s perspective.

Responsibilities

- Use React Native to build slick and robust native apps.
- Work with a multi-functional team and ship the features timely with an acceptable quality
- Work closely with backend engineers to understand, design, and contribute to our APIs
- Build efficient and reusable front-end systems and abstractions
- Understand and excel at front-end standard methodologies

Qualifications

Your Skills

Javascript & Typescript, HTML, SAT, CSS data exchange e.g. via REST-APIs, JSON & XML, Git or another VCS (because versioning is a must in software development), Linux or MacOS

Your Profile:

- Strong OOP concepts and Client-Server architecture understanding.
- Must be proficient in iOS and Android development.
- Solid understanding of web service standards (JSON, REST, etc) specifications and frameworks and XML and Git Hub.
- Proficient in Android Studio, React Native, XCode and Android SDK
- Working with API's
- Very good knowledge of programming with HTML and CSS (HTML5, CSS 3, SASS/LESS)
- Extensive experience in developing JavaScript and using frameworks such as **ReactJS** and AngularJS
- Maybe you already have experience with Node.js or you are willing to get used to it.
- Experience with compatibility problems of different web browsers
- Know-how in quality assurance processes and tools of frontends
- At best you can do simple tasks in PHP programming and template languages (TWIG, Fluid, etc.) or you bring the willingness to be there.
