Sr. PHP Developer

Description

We are working with European and German Market in domain of Ecommerce, Web and Mobile applications to develop and implement scalable online shop solutions, Payment Gateway based on technologies such as PHP, Perl, MySQL, Javascript, ElasticSearch and Redis.

We're looking for enthusiastic Software developers who enjoy developing their skills and contributing their ideas to ongoing projects. We offer a variety of different challenges in our development teams.

We are looking for a PHP Developer responsible for managing back-end services and the interchange of data between the server and the users.
Your primary focus will be the development of all server-side logic, definition and maintenance of the central databases, and ensuring high performance and responsiveness to requests from the front-end.

You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

Responsibilities
Your tasks:

- Conception, development and implementation of E-Commerce platforms, web applications and web services.
- Integration of user-facing elements developed by front-end developers
- Build efficient, testable, and reusable PHP modules
- Solve complex performance problems and architectural challenges.
- Development of Software Application prototypes, web application and mobile apps.
- Development of Software modules to solve real industrial problem for German Market.
- Specification and development of interfaces, e.g. REST-APIs.
- Contribution to the design and development solutions in agile, interdisciplinary and distributed teams.
- Consultation and close cooperation with Backend Developers, UI/UX designers and developers.
- Evaluation of frameworks, tools and services.

Qualifications

- **Your profile:**
  - Studies or training in the field of computer science, Software Engineering, media informatics or similar subject area.
  - Demonstrable knowledge of web technologies including HTML5, PHP, CSS, Javascript, jQuery, AJAX, Smarty, LESS/SASS, XML and Doctrine.
  - Good knowledge of relational databases, ORM and ERP systems.
