We are Certified Business Partner of Shopware AG.

We have developed over 100 Plugins.

We have worked on our 50+ Shopware Projects

We have design and implemented 10+ Themes for Shopware

Reference Projects

We have accomplished 25+ projects

We have designed and implemented 20+ themes

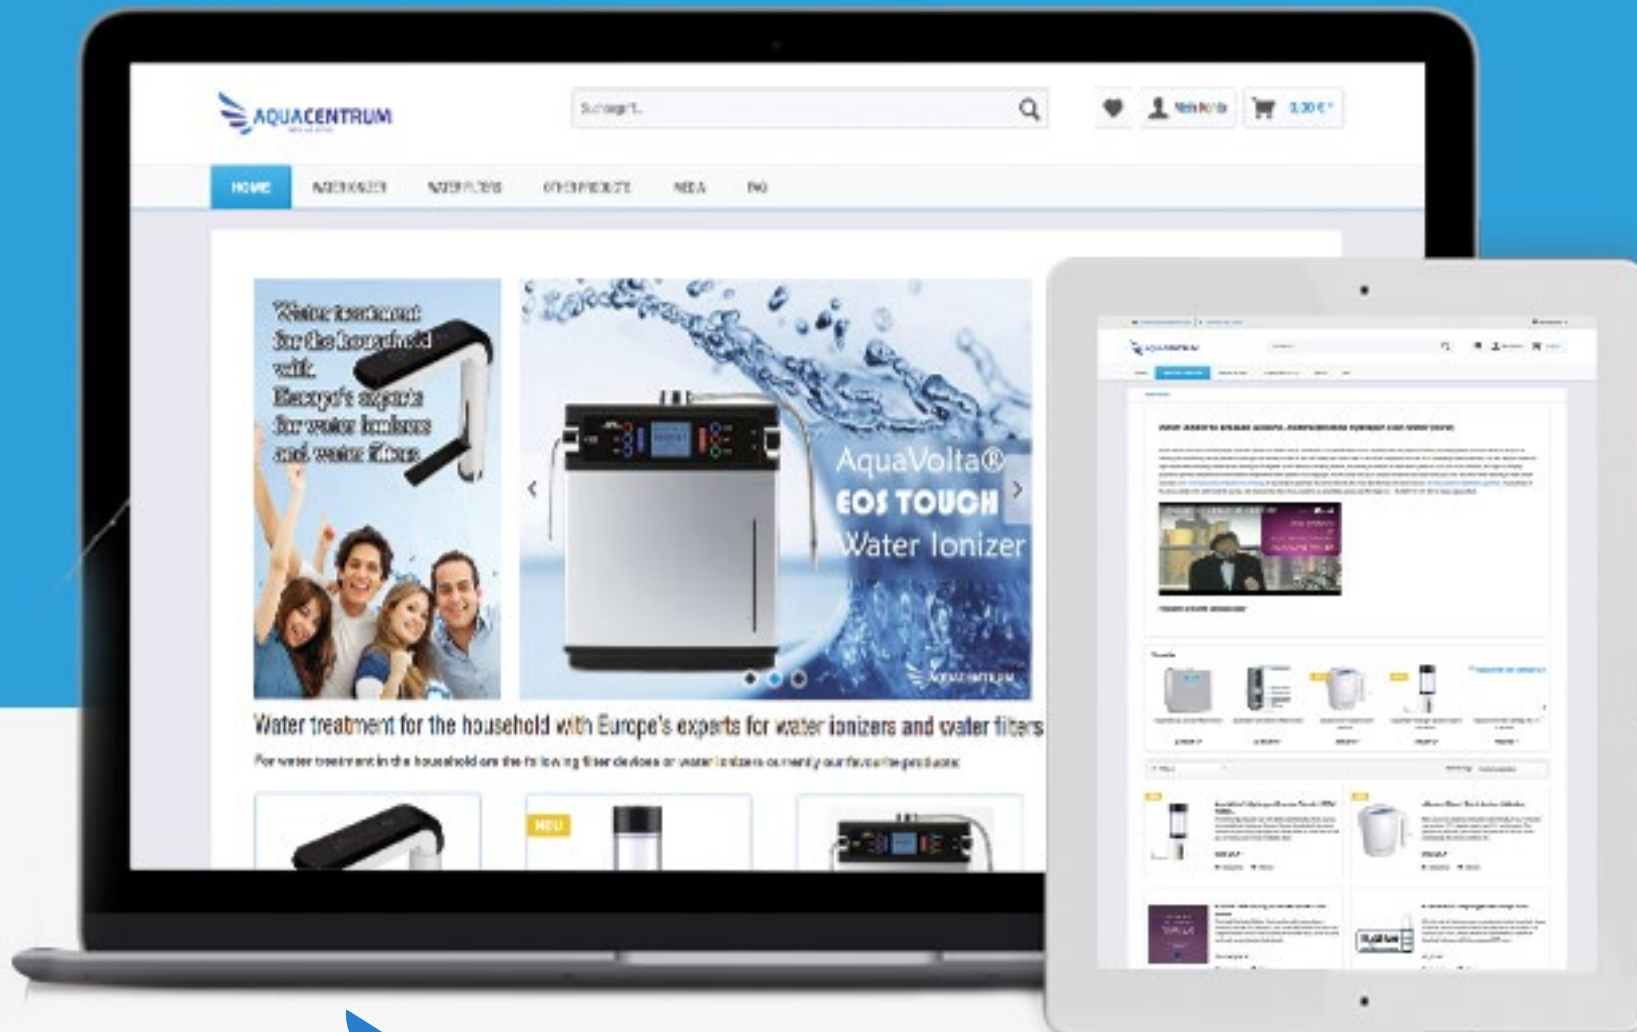

We have integrated Woocommerce payment gateway in many projects

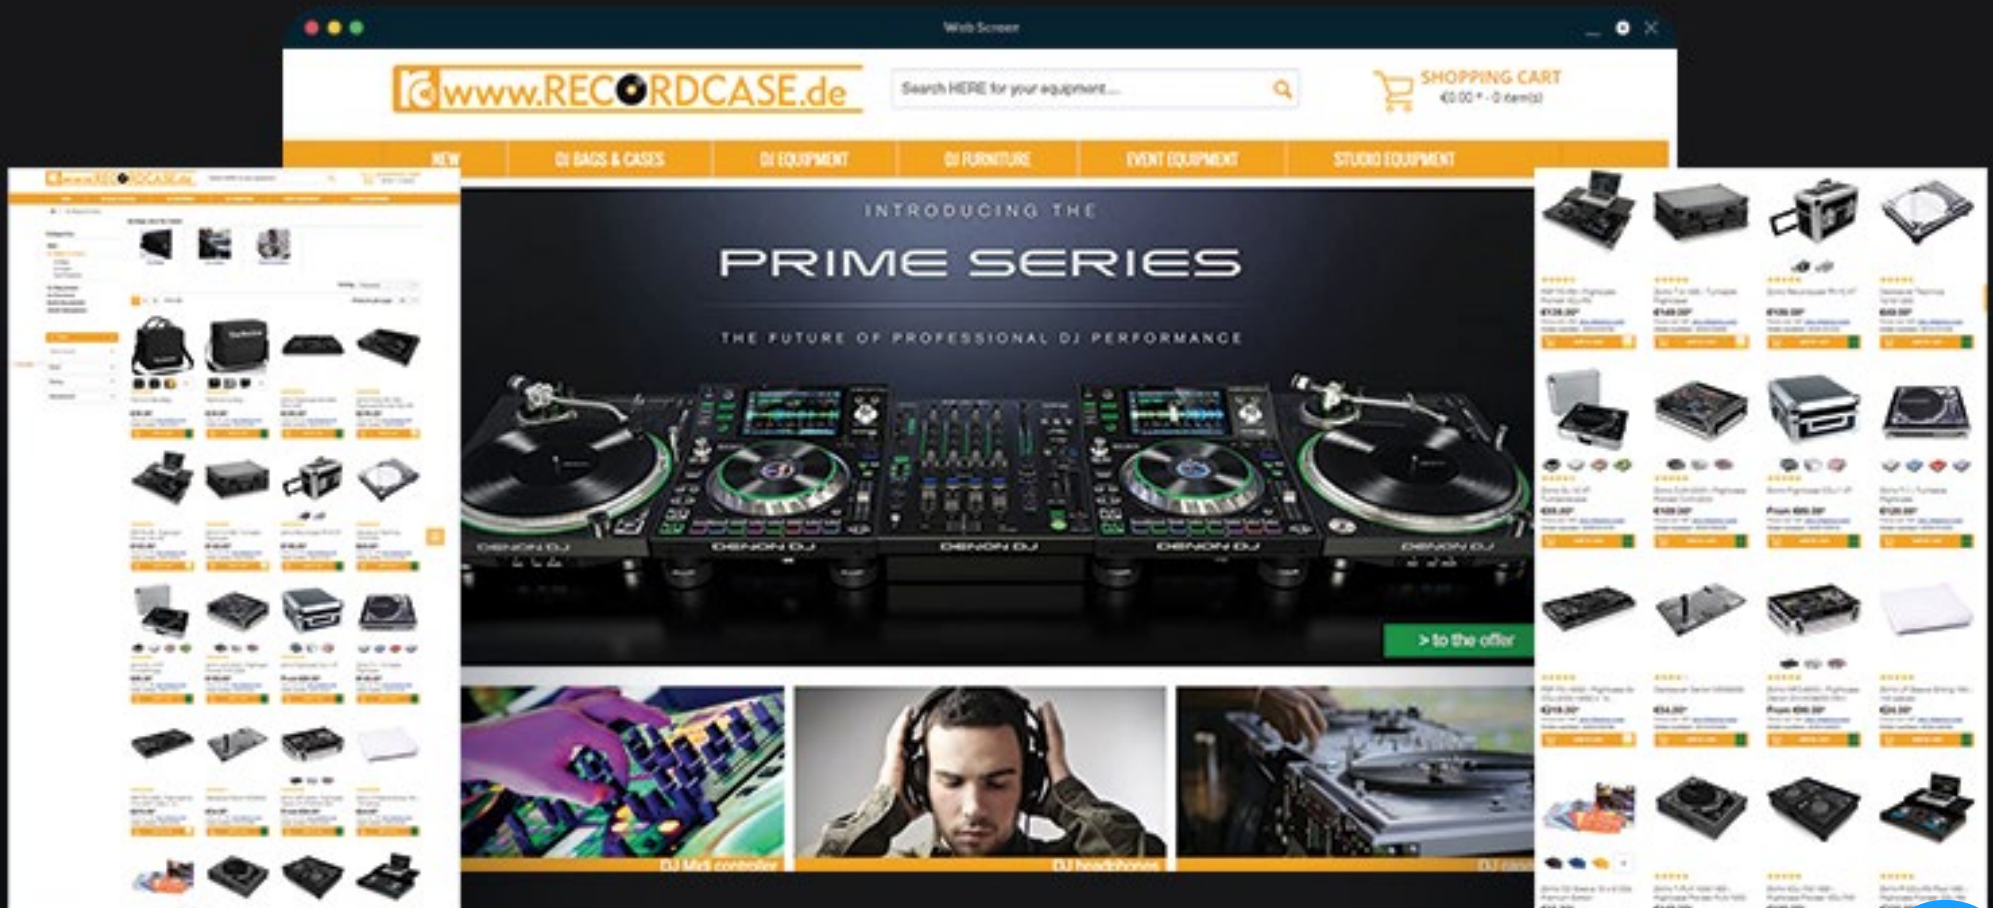

We have developed themes by using Fusion Builder & Visual Builder

Reference Projects

BrandCrock designs custom user interface for aquacentrum. We have migrated data from old Wordpress site to Shopware 5.4.2. We have developed various plugins like bundle products, discount, price range, and product sorting plugin. Custom invoice and email templates are also a part of project

Implementation of custom theme on Shopware with several plugin development for instance stock availability, url redirect etc. & bugs fixing.

MARKISO

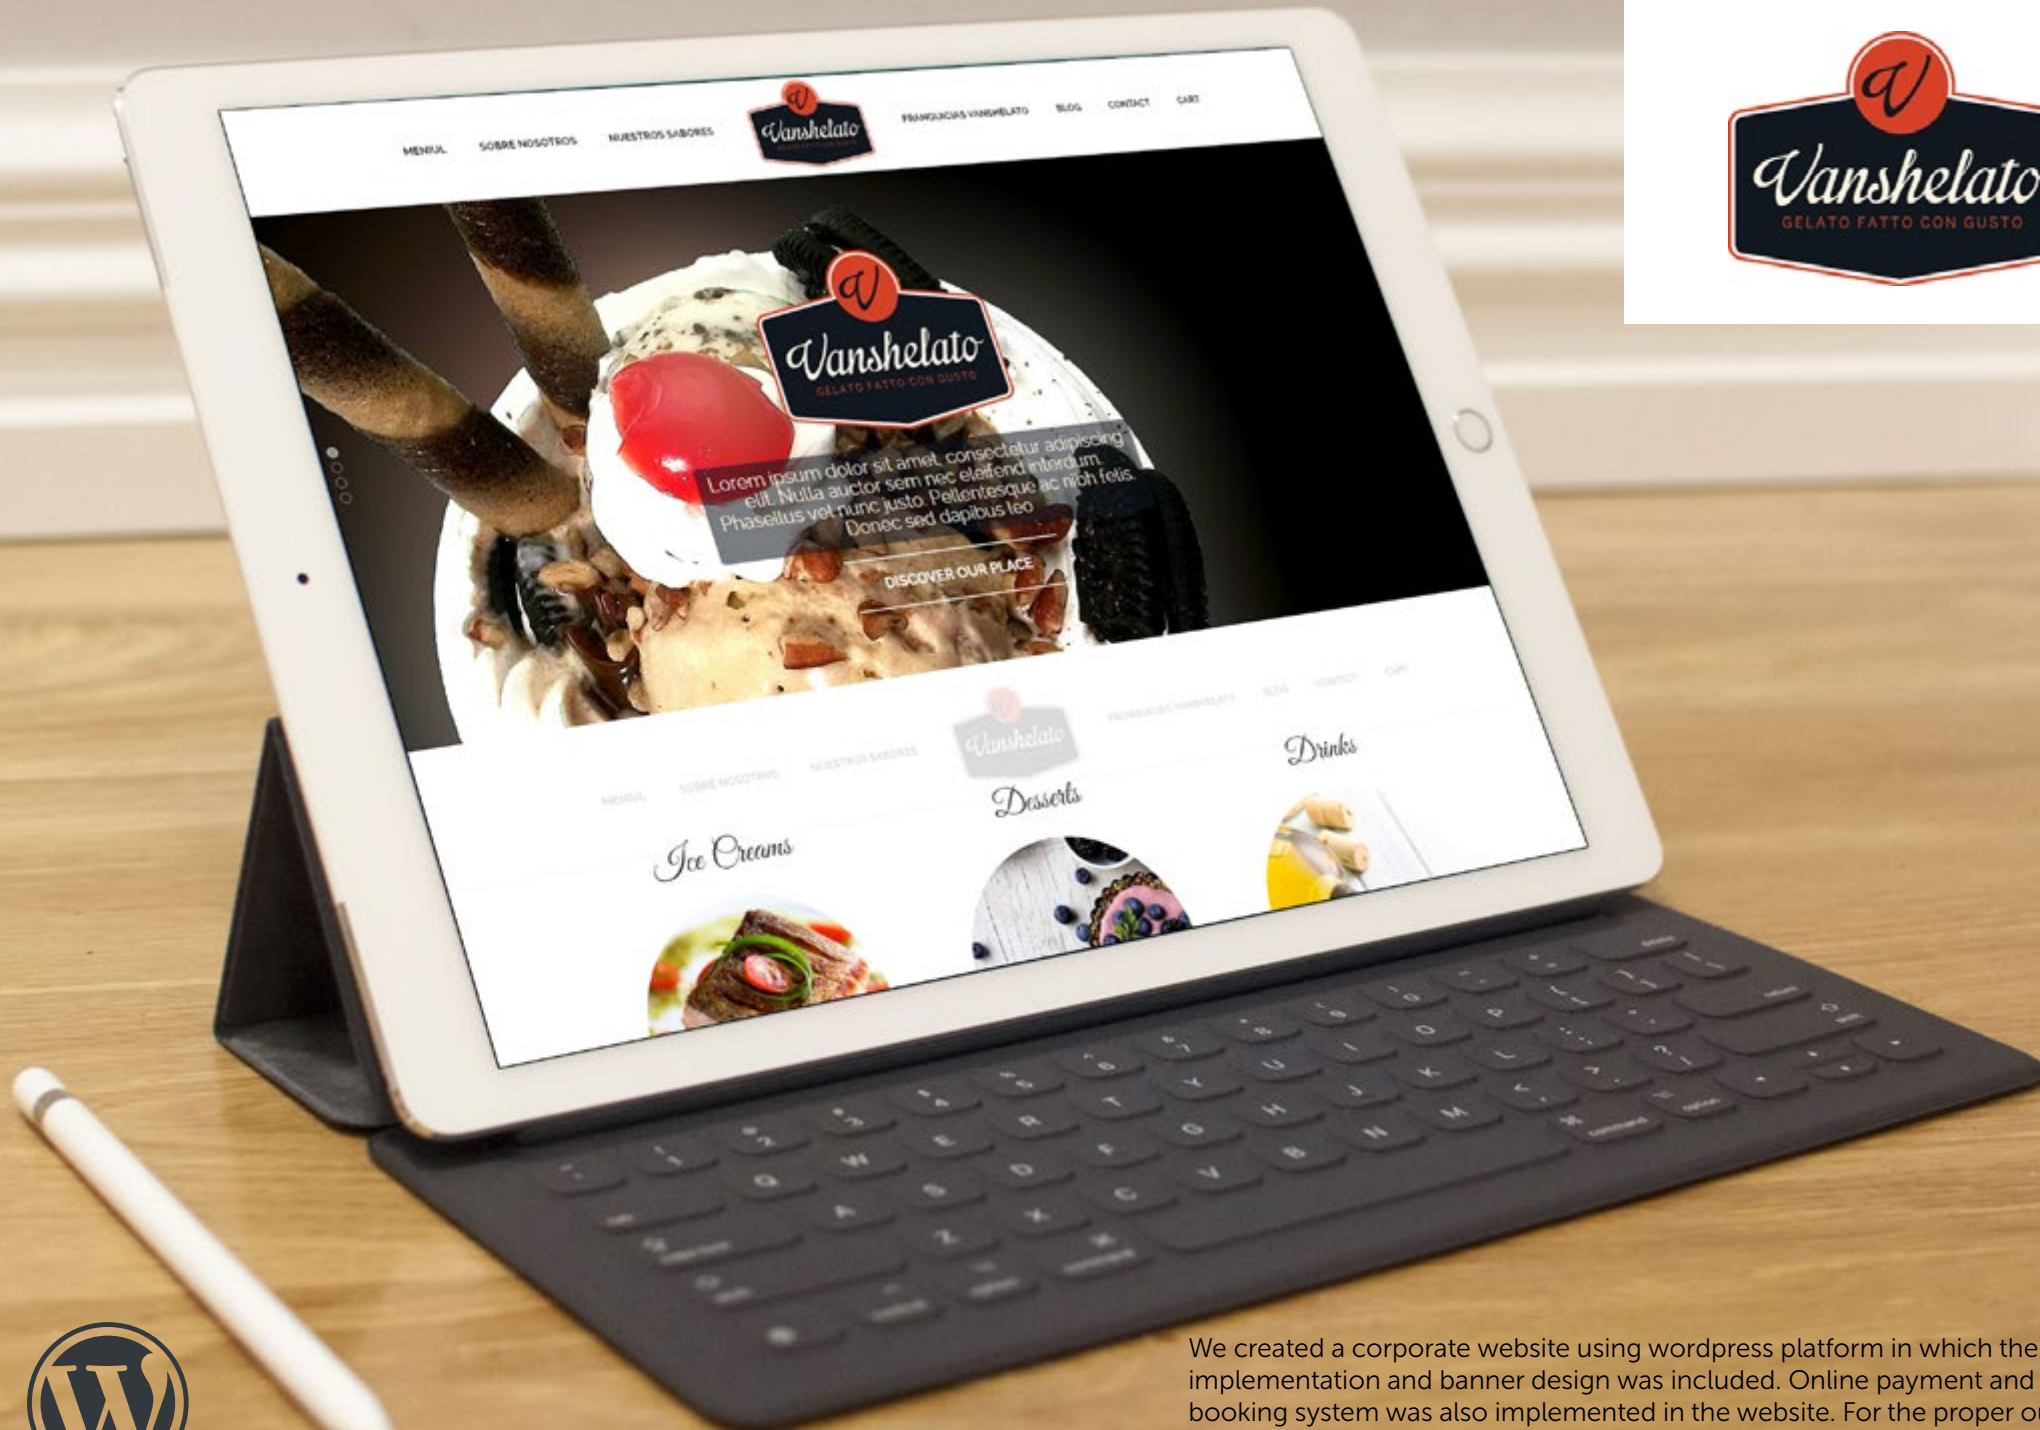

Markiso shop was based on PlentyMarket, in which all queries are self-handled and is very expensive. Our task was to shift all data and products to Shopware 5.3. We also used Cron Jobs which updated data at the given time and also import items in future automatically. Shopware theme was used for the Shopware development; also theme was expanded before implementing. Content and page migration from PlentyMarket to Shopware was done using Shopware connector. Shopware theme is expanded to completely optimize theme and integrate approachable shop.

NOVALNET Pvt Ltd
Software Solutions Worldwide

For the Novalnet software solutions, we develop the corporate design, banner design and the development of corporate website with Wordpress.

We created a corporate website using wordpress platform in which theme implementation and banner design was included. Online payment and booking system was also implemented in the website. For the proper outlook of menu, foodpress menu plugin is used in the website. In addition to all these functions we offered custom email template.

We made a corporate website for Shimla restaurant using wordpress. We created complete website appearance and made banner and logo design, including brochure designs of different sizes. We offered them our professional consultation. We add integration of reservation system by introducing a plugin created by our development team.
